PROFESSIONAL SUMMARY

Aspiring Software Engineer combining full-stack development skills with a competitive programming mindset. Active on CodeChef (1317 - highest rating) and Codeforces(923 - highest rating), with over 160 DSA problems solved on LeetCode. Dedicated to building responsive UIs with React while writing clean, optimized backend logic with clean architecture.

EDUCATION

Bachelor of Technology (Artificial intelligence)
Newton School of Technology, Rishihood University

2024 - 2028
Grade: 8.08/10.0

Intermediate (Class XII)
Khemo Devi Public School

2023 - 2024
Grade: 83.8%

Matriculation (Class X)
St.Theresa's Convent School

2021 - 2022
Grade: 91.4%

PROJECTS

Intelligent News Credibility Analysis ([Github](#)) ([Demo](#))

February 2026

- Developed an **NLP** pipeline to classify news articles as Fake or Real for misinformation detection. Designed preprocessing and TF-IDF feature engineering to convert raw text into high-dimensional representations.
- Implemented using **Python**, **Scikit-learn**, **TF-IDF vectorization**, and **Linear SVM** with cross-validated hyperparameter tuning. Built a unified ML pipeline integrating preprocessing, model training, and inference to prevent data leakage.
- Achieved **99% accuracy** and **F1-score** on the ISOT dataset, demonstrating strong performance for high-dimensional text classification tasks. Designed the system to support future explainable AI and transformer-based extensions.

VocaCoach ([Github](#)) ([Demo](#))

October 2025

- Built a real-time, human-like voice interaction platform to overcome the limitations of scripted and text-based systems by enabling natural, conversational interview practice, interactive learning, and continuous language improvement.
- Engineered a low-latency, full-stack voice system using **Node.js**, **Convex DB**, **DeepSeek API**, **AssemblyAI**, and **AWS Polly**, optimizing asynchronous speech pipelines and reducing **40% speech-to-response latency**.
- Enabled personalized mock interviews, topic-based conversational learning, and language practice through an end-to-end real-time voice pipeline (speech recognition → reasoning → voice response) designed for scalability, reliability, and smooth conversational flow.

CERTIFICATIONS

Intro to Machine Learning Kaggle ([Link](#))

January 2026

Completed **Kaggle's Intro to Machine Learning** certification with hands-on experience in supervised learning, data preprocessing, feature engineering, and model evaluation using **Python**, **Pandas**, and **scikit-learn** on real-world datasets.

SKILLS

Computer Languages: Machine Learning, Python, NoSQL, JavaScript, C++, SQL

Software Packages: Figma, Express JS, Tailwind, Prisma ORM, MySQL, MongoDB

Soft Skills: Creativity, Critical Thinking, Communication Skills

Others: Git and Github, Spreadsheet, UI/UX, Problem-Solving, OpenAI API, API testing, OAuth 2.0

EXTRA-CURRICULAR ACTIVITIES

- Participated in **Smart India Hackathon 2024**, collaborating in a team to solve real-world problem statements under competitive time constraints.
- Core Committee Member, **OOPS (College Competitive Programming Club)**, actively involved in organizing contests and promoting problem-solving culture on campus.
